SSL CONFIGURATION **NEW**

Includes the SSL protocol configuration that will ensure your website visitors' information is encrypted and secure (SSL Certificate should be provided by the domain owner).

TTS WeBook Booking Engine

FEATURES

GENERAL | iframe quick integration

ALL TRAVELPORT GDS	Supports full integration with Apollo, Galileo and Worldspan GDS.
EASY AND QUICK INTEGRATION	Iframe to be embedded in any internet webpage. No technical skills needed, you just have to copy the iframe code block and paste it on the page where you want to sell air content. You can use the iframe simultaneously in as many internet pages as you want, like your agency website, Facebook page or partners' website.
ADAPTABLE TO YOUR LOOK AND FEEL	Custom responsive iframe size and colours allow full adaptability to your look and feel.
CURRENCY FLEXIBILITY	Uses the currencies supported by the GDS and can be customized per agency.
MULTI-LANGUAGE	Supports English, Portuguese and Spanish (being prepared to accommodate other languages) and it is automatically selected based on the user's browser preferred language.
VIEWTRIP INTEGRATION	Integration with VIEWTRIP to send the VIEWTRIP itinerary link to the client, supporting also the agency's VIEWTRIP White Label.
REGISTER AND LOGIN	Maintains a clients' database with a simple and short registration form. Login credentials are only necessary to close the booking and to access the back office.
CUSTOM SEARCH FORM <small>NEW</small>	Supports a search form independent from the iframe that can be customized to integrate seamlessly with the look and feel of your homepage.
MANAGE YOUR SETTINGS	There is an available back office for agencies to manage their settings.
REGISTERED CLIENTS DATA	Area where agencies can access their registered clients and export the information.

BOOKING | simple and quick

BEST PRICE SEARCH	Best Price search is based on Best Buy searching method and presents the prices sorted by cheapest price and the respective available flights.
-------------------	--

ONE-WAY FARING	One Way Faring is an availability & fare search method that lets users combine different fare types and carriers in one itinerary and is available for domestic Australian, domestic New Zealand and Trans-Tasman flight searches which are mainly governed by One-Way pricing. TTS WeBook Booking Engine supports this pricing method and offers an interface designed having this method in mind which allows the user to walk through flight results easily and quickly and combine different fare types and carriers in one itinerary.
PRIVATE FARES	Available private fares are displayed together with published fares.
COVERS SEVERAL JOURNEY TYPES	Users can search One Way, Round Trip and Multi-destination trips.
COVERS SEVERAL PTCs	Users can search and book for adults (ADT), children (CNN), infants (INF) and infants with a seat (INS).
ADVANCED SEARCH PARAMETERS	Users have additional parameters to refine searches like Class, Carrier, Flight Number and Direct Flights.
FLIGHT DETAILS	Users can access flight details per flight: Flight Number, Carrier, Duration, Distance, Aircraft, Operating Carrier and Fare Rules.
EXTENSIVE FILTERS	Results can be filtered by Price, Departure time, Marketing Carrier and number of Stops.
CHECKED BAGGAGE	Immediate visual and detailed access to the checked baggage allowed.
ITINERARY SUMMARY	An itinerary summary is always present so that the user can see what he is booking at any moment.
PRICING BREAKDOWN	The pricing is shown by PTC and breakdown by Fare, Taxes, and Service Fee and if necessary specific taxes may be itemized per market to comply with legal market requirements (e.g. tax GST for the Australian market - tax code UO - charged on domestic Australian journeys).
APIS	Passenger details support APIS data.
REMARKS	Supports custom remark fields to accommodate user additional information like promo codes or client special requests.
CREATES PNRs	A PNR is created in the GDS when the user makes the booking.

SETTINGS | the flexibility you need

RESERVATIONS QUEUE	Define the Queue where you wish to receive the reservations made at TTS WeBook Suite Booking Engine.
ACTIVATE DIRECT FLIGHT PARAMETER	When activated, the “Only direct flights” parameter will be shown as selected by default at flight search.
APPLY SERVICE FEE ONLY IF XP IS NOT APPLICABLE	Agencies can define if they want to always apply their Service Fee or do it only when XP is not applicable, to avoid fees accumulation.
OPTIONAL ACCOUNT VERIFICATION	If the account verification is activated, an account will only be considered valid if the user confirms his email which prevents bookings from non-existent email addresses. On the other side, if the account verification is deactivated, the email verification process will not take place.
MINIMUM ADVANCE RESERVATION DAYS	Agencies can define the minimum number of days in advance reservations can be made so that it doesn't accept reservations which the difference between the reservation day and the departure day plus 1 is smaller or equal to the minimum advance reservation days defined. E.g.: if an agency doesn't want to receive reservations starting in the same day the reservation is being made, the agency just needs to insert “1” in this field.
EXCEPTION WEEKDAYS	It allows agencies to tell the system which weekdays are non-working days. E.g.1: If a user is trying to make a reservation on a Saturday and the minimum advance reservation days is zero but defined Saturdays and Sundays as Exception Days, the system will only let the user search for a trip that starts on the following Monday or after. E.g.2: If a user is trying to make a reservation on a Wednesday, the minimum advance reservation days is three and defined Saturdays and Sundays as Exception Days, the system will only let the user search for a trip that starts on the following Monday or after.
EXCEPTION DAYS	It allows agencies to enter specific days of the year as non-working days.
AGENCY TERMS AND CONDITIONS	Add your travel agency Terms and Conditions for your clients to read and accept at booking time.
CUSTOM TITLES	Allows your travel agency to add your own titles so that your clients can be addressed in the way they are used to.
CUSTOM CONFIRMATION PAGE TEXT	Agencies can add a custom text to the confirmation page to greet the client or advise about payment details or add other information the agency considers relevant.
CUSTOM CONFIRMATION EMAIL	Agencies can customize their booking confirmation email: subject, body and footer.

ACCEPT PAYMENT THROUGH FOP	Allows your travel agency to request credit card details to the client and adds them to the Form of Payment field (FOP) of the PNR.
COLORS CUSTOMIZATION	Advanced colour scheme customization to support full iframe brand integration: 5 parameters available.
CUSTOM REMARKS MANAGEMENT	This section allows agencies to create the remarks that will be added to the PNR. The remarks can either be set to be directly added to the PNR without asking the user to fill-in anything or make them visible on the booking page to receive information from the user (e.g. to support promo codes or allow the user to insert a special request).
FEES	Supports XP and Service Fees. All fees can be set by "Flight Type" (Domestic, International and Intercontinental), "Journey type" (One Way, Round Trip and Multi-destination) and "Up to" (fare range) which will allow the agency to set the fee depend on the fare amount. Fees can be set as an absolute value and/or a percentage of the fare amount.
BLACKLISTED CARRIERS	This section allows agencies to specify the carriers they wish to exclude from the search results.
RECOMMENDED CARRIERS	This section allows agencies to specify the carriers they wish to point out to their users as being the ones the agency recommends.
PRIVATE FARES	Supports Cat35, Account Code, Tour Code and Published private fares and users can set private fares for both One Way and Round Trip journey types and add OSI per private fare. Private fares can be exported to an Excel file.

ADD-ONS | optional complements

CALENDAR SEARCH	This add-on allows users to visualize the best flights and fares available for the days around their trip by just clicking the 'best price/calendar search' option.
PAYMENT GATEWAY NEW	Allows clients to pay for their trips online as part of the booking process wherever the TTS WeBook Booking Engine is integrated: your website, your Facebook page or your partners' website. It accepts credit card, debit card and PayPal payments and supports multi-currency.
